

To be treated as their "number one" client is something very special.

When we engaged SDP's services, it was a very smooth transition. They tailored to what we needed; not based on what they normally do for other clients. Our company has so many divisions with various departments under these divisions. We were impressed that SOP worked with us to follow the very detailed labor related GL instruction we gave them.

With SDP's Millennium payroll platform, payroll processing is much faster and more efficient than any of the previous vendors we used. Our Payroll and HR departments are so pleased with the system, it is very user friendly and easy to navigate. Employee pay history is only a click away and reports are much faster to obtain. Being able to combine previous year info with current year (for fiscal year accounting) is a timesaver. Daily synchronization gives us peace of mind that current data is stored and saved. Their online support is an amazing tool. We love the remote desktop access by their support group. Also from time to time, we have special needs and they are very accommodating.

Their service is beyond compare. I give them two thumbs up!
